New Information
Theft of Maricopa County Sheriff’s Vehicle
Release of Video

January 12, 2017

The Maricopa County Sheriff’s Office has released video of the theft of its vehicle by a suspect on January 5, 2017. The incident occurred in Gila Bend.

31-year-old Lisa Luna of Mesa, Arizona is accused of stealing the pick-up truck and leading multiple agencies on a high-speed chase that covered over 70 miles. Luna lost control of the truck after colliding with another vehicle on Interstate 10 near Eloy and drove it into the median where she was arrested. She is in the Maricopa County jail facing multiple charges. No future court dates have been set.

MCSO had responded to calls that a disrobed woman, later identified as Lisa Luna, was walking up S. Butterfield Road in Gila Bend. Deputy Francisco Campillo offered Luna a blanket to cover herself when she entered his vehicle and left the scene. The Deputy was injured while trying to stop the vehicle, was treated and released, and is now back on duty. He has been a Maricopa County Sheriff’s Deputy since 2005 and is currently assigned to the District 2 Substation.
When Deputy Campillo first encountered Lisa Luna at the scene, she told him she had been sexually assaulted, a story she recanted while in custody. The Deputy was compassionately assisting what he believed to be a sexual assault victim when Luna took his vehicle. MCSO’s Professional Standards Bureau continues its review of the actions taken by the Deputy in this incident. This is standard procedure.

Two separate videos are being released. Because she was disrobed, MCSO has blurred Lisa Luna’s form: The videos are from:

1. A security camera at the Shell Station in Gila Bend.
2. A body camera worn by the MCSO Deputy.

Anticipating that you will ask:
- Sheriff Paul Penzone and Chief Deputy Ben Henry are not available for interviews on this incident.
- Members of the MCSO Investigative teams are not available for interviews on this incident.
- The responding Deputy and members of the MCSO Professional Standards Bureau are not available for interviews on this incident.
